You are …

… interested in the IT industry?

… seeking new job prospects?

… looking for a training that can be completed on-site or remotely/online?

… experienced in computer application and usage?

… resilient and committed to undergoing a demanding training lasting several months?

… proficient in English at level B2 or higher?

→ Then this course is for you!

→ Speak with your advisor!

You will …

… complete a certified SAP ABAP training in 12 weeks

… be prepared practically and technically for the demands of the industry

What we offer

Certified modular training for „SAP ABAP Developer"

The training consists of:

- Introduction to Programming & ABAP Basics
- ERP, Business Processes & S/4 HANA
- Core Concepts in ABAP
- SQL Database
- Data Dictionary and Debugging
- Object-Oriented Programming in ABAP
- Advanced Class Concepts and Best Practices (OO design)
- CDS Views
- ABAP RESTful Application Programming Model (RAP)
- Code Analysis & Testing
- Internal Table Performance and Authorization
- Advanced CDS and ABAP Cloud

Participation is possible both online and in person

This course is easily accessible and therefore particularly suitable for individuals who, for various reasons, do not have access to traditional educational offerings.

Live instruction and support from qualified trainers

Requirements

- English language skills at B2 level or higher
- Good user proficiency in computer usage
- Strong interest in a future in the IT industry
- Resilience and the willingness to undergo a challenging training
- No restrictions based on age, previous professional background, or education
